PROFILE

Hi everyone, my name is Daniel!

I develop algorithms and prediction models for complex data, including text, images, audio, etc.

I do data processing, look for patterns, build visualizations, and use the data in further development.

I am a participant and finalist of the NTO Olympiad in Big Data and Machine Learning (BD&ML), as well as a finalist of the Yandex ML Cup in RecSys.

I am interested in this field and plan to further develop in it. My goal is to learn how to apply artificial intelligence to solve a wide range of problems, especially in robotics.

EDUCATION

Secondary complete education, MGEE ACS №6   Ramenskoe
Sep 2011 — Jun 2022

Bachelor's degree, RTU MIREA
Sep 2022 — Present   Moscow

COURSES

Machine Learning
OmSTU, Artem Shevlyakov

Special neural network architectures
OmSTU, Artem Shevlyakov

«Generation Python» course for advanced learners
BEEGEEK School
